RESPONSE TO DECISION ON PETITION TO MAKE SPECIAL

This is a Response to a Decision on Petition to Make Special dated May 23, 2001. The Response is timely make within the two months of the mailing of the Decision. Applicant will respond below to each of the grounds or items (B), (C) and (D) for rejecting Applicant's original Petition.

With regard to item (B), Applicant states that if the Office determines that all the claims presented are obviously directed to a singe invention, Applicant will make an election without traverse as a prerequisite to the grant of special status.

With respect to item (D), Applicant provides herewith the requested complete copies of U.S. Patent Nos. 5,193,056 and 5,999,917.

With respect to item (C), Applicant asks the Examiner to reconsider his refusal to accept of "a text search" of databases, as opposed to a search by class and subclass. Applicant respectfully notes that Applicant's search was just not limited to particular class(es) or subclass(es) (in this case a handful subclasses in Class 705), but rather included not only all classes and subclasses of the classified patent records of the U.S. Patent and

Trademark Office, but also International Publications, Publications of the European Patent Office and publications from the technical literature, It is urged that Applicant's search covered a significantly greater field of the prior art than a search of a few subclasses within Class 705, for example.

The undersigned has discussed the issue of database or text searching with Group Director, who has indicated that such searching will be accepted.

If the Examiner is unable to now grant Applicant's Petition to Make Special, he is requested to place a call to the undersigned, whereby any remaining issues may be resolved.
